

Are your photos (digital and paper copies) and home videos hiding in a box or closet somewhere? Do you ever wish there was an easy and fun way to view and share your memories?

Real Image will create a professional DVD for you with your video and/or photos, add transitions (such as the popular Ken Burns effect), include opening titles and credits, add still pictures, and best of all, bring it all alive with music. Our videos are personal, fun to watch and each one is completely unique.

These videos make fabulous gifts for friends and family. Imagine giving your parents and in-laws a 30-minute video of the best moments of their granddaughter's childhood, distilled from several hours of home videos, and with stills interspersed throughout. Or contemplate giving your sister, for her 60th birthday, a video compiled from old home movies and baby pictures. What could be a more thoughtful expression?

Let us create a professional, personalized video with your photos and/or home movies for the following occasions:

- * Weddings
- * Vacations
- * Birthdays
- * Anniversaries
- * Retirement parties
- * New baby celebrations
- * . . . and much more!

In general, the price for a 30-minute video will range from \$90 to \$150 depending on several options you may choose from. Since our productions are very specialized, pricing will depend on:

- Number of pictures and/or length of video
- Number of songs
- Photo editing services (if requested)
- Transitions
- Scene selection page
- Number of titles or captions (if requested)
- Credits (if requested)
- Number of DVDs requested.
